

Syed Ali Tariq

Address: House 516, Street 20, Sector-A, Askari-14, Rawalpindi, Pakistan
Date of Birth: September 17, 1988
Mobile: +(92) 313 5155012
Email: s.alitariq1@gmail.com
LinkedIn: www.linkedin.com/in/alitariq-syed

Deep learning expert with over 5 years of experience in designing, training, and optimizing state-of-the-art deep learning models for computer vision problems. Strong research and development skills having authored more than ten research papers. Strongly motivated to achieve optimal results for any given task. Can work independently to solve problems. Good at multitasking and time management skills to meet deadlines. Effective at task delegation between junior team members and evaluating their performance.

Expertise

- Artificial Intelligence (AI), Deep Learning (DL), Explainable AI (XAI)
- Convolutional neural network (CNN), Vision Transformer (ViT)
- Natural Language Processing (NLP) for image-to-text generation
- Deep learning models deployment to web and cloud
- Video and Light Field (LF) compression using HEVC/H.265 and MV-HEVC
- Parallel programming using Graphical Processing Unit (GPU)

Education

Doctor of Philosophy (Computer Science), COMSATS University, Islamabad, Pakistan	2019 – 2023 (Expected)
• Area of research: <i>Explainable Artificial Intelligence (XAI)</i>	
Master of Science (Computer Science) Abasyn University, Islamabad, Pakistan	2014 – 2017
• CGPA of 3.87 out of 4.0 (Gold Medalist)	
• Thesis Title: <i>Palmprint matching using GPU</i>	
Bachelor of Science (Computer and Information Sciences)	2007 – 2012
• CGPA of 2.72 out of 4.0	
• Pakistan Institute of Engineering and Applied Sciences (PIEAS), Islamabad, Pakistan	
GCE O (Edexcel International) & A-Level (Cambridge)	
• A-level from DHA Public School O&A Levels, Karachi, Pakistan. (77.5% equivalent)	2005 – 2007
• O-level from The British School in Colombo, Colombo, Sri Lanka. (81.1% equivalent)	2003 – 2005

Ph.D. Experience

Sep 2019 – Present

- Ph.D. research is focused on explainability of convolutional neural networks (DCNNs).
- This research aims to uncover the reasons behind a CNN model's decisions to improve their understanding and transparency that is beneficial for high-risk environments such as medical imaging or autonomous vehicles.
- Developed a method that introduces a way of knowledge extraction through an in-built probe of the CNN.
- Introduced an optimization that can identify critical neurons that can be used to explain model's decisions through counterfactual and contrastive reasoning.
- Benefits of method: security-critical applications, model debugging, model repair, model compression, misclassification analysis, adversarial attack detection, machine teaching applications.

Work Experience

Research Associate Mar 2020 – Present

Medical Imaging and Diagnostics Lab (MID), NCAI, COMSATS University, Islamabad.

- Developed state-of-the-art DL models for Tuberculosis and COVID detection using chest X-ray and CT scans.
- Currently hold the first position worldwide on TBX11K competition leaderboard: <https://competitions.codalab.org/competitions/25848#results>

- Developed a computer-aided diagnostic system called Pulmonary Diagnostic System (PDS) for lung disease identification.
- Deployed product to Microsoft Azure cloud platform.
- Performed fieldwork to gather medical datasets from local laboratories and healthcare institutions.
- Assigned tasks to research assistants and MS students and monitored their performance.
- Authored research papers and funding proposals.
- Participated in exhibitions to showcase the developed products.

Trainer/demonstrator

Aug 2021

- Designed and conducted hands-on training on developing and training CNNs and generative adversarial networks (GANs) for computer vision problems at beginner and advanced levels.

Teaching assistant

Jan 2019 – Jan 2020

COMSATS University, Islamabad

- Assisted with administrative tasks, material preparation, and paper marking and uploading.
- Prepared and delivered tutorials on creating and training CNNs using Tensorflow/Keras.

Research Assistant

Apr 2019 – Mar 2020

Medical Imaging and Diagnostics Lab (MID), NCAI, COMSATS University, Islamabad.

- Worked on identification and classification of various lung diseases using DL methodologies.
- Worked on development of web-based tuberculosis identification system using Python/Django framework, authored journal papers, and supervised MS students.

Research Assistant/Software Design Engineer

May 2016 – Mar 2019

House of Technology Pvt. Ltd., Islamabad, Pakistan.

- Worked on research projects including tuberculosis identification, surgical telementoring system using HEVC, fingerprint classification, face recognition, and palmprint/fingerprint identification using parallel GPU programming (Nvidia CUDA). Light Field compression using HEVC and MV-HEVC.
- iOS chat app and auto parts app development. MS Excel reports using VBA and SQL.

Tools and skills

Following is the list of tools, technologies, and languages with expertise and experience:

Artificial intelligence: Python (Tensorflow, Keras, Pytorch) • MMDetection • NumPy • Flask • Pandas • Scikit-learn • Jupyter notebook

Development: HTML • CSS • Bootstrap • Javascript • MS Azure • iOS (Objective-C) • SQL • MS Excel (VBA)

Others: HEVC/MV-HEVC • Matlab • Latex • Github • Nvidia CUDA • C++ • Linux

Research Activities

Research projects

1. Research collaboration with Prof. Mårten Sjöström at Mid Sweden University, Sundsvall, Sweden, titled: “*Collaboration between Sweden and Pakistan to Investigate Rate Distortion Optimization for Light Field Compression*” - approved by The Swedish Foundation for International Cooperation in Research and Higher Education, STINT, 2019.
 - a. Worked on Motion Estimation (ME) optimization for Light Field (LF) compression using Multi-view extension of High-Efficiency Video Coding (HEVC/H.265).
 - b. Designed and conducted Deep Learning labs for the course “Computer Vision using Deep Learning Techniques with Hands-On Implementation in Python/Keras”.

Achievements and Awards

- Currently hold the first position in TBX11K Tuberculosis Classification and Detection Challenge: <https://competitions.codalab.org/competitions/25848#results>
- Received Gold Medal for achieving GPA of 3.87 in MS degree from Abasyn University, Islamabad, Pakistan.

Extracurricular Activities

- Participant E-gaming competitions (PIEAS 2008 – 2011)
- Organizer Annual Cyber Pieasian League (CPL) (PIEAS 2009)
